## CAREER OBJECTIVE

---

Versatile technology professional who builds, automates and secures cloud infrastructure and turns complex data into clear decisions. Experienced across AWS cloud engineering, DevOps, full-stack development and data analysis, with a record of reducing deployment errors, cutting manual effort and improving reliability for clients. A clear communicator who works well in remote, cross-functional teams, with a strong focus on secure, scalable and well-documented solutions, and growing toward cloud architecture and secure AI workloads. Recognized for balancing innovation with cost, risk, and scalability trade-offs to drive long-term organizational value.

## TECHNICAL SKILLS

---

- **Cloud Platforms & Services:** AWS (expert), Azure & GCP
- **Infrastructure as Code & Automation:** Terraform, Ansible, AWS CloudFormation, Python & Boto3 automation, Bash scripting
- **CI/CD & DevOps Tools:** AWS CodePipeline, CodeBuild, GitOps, Helm, Git, GitHub, Docker, Vercel
- **Containers & Orchestration:** Docker, Kubernetes, Amazon ECS, Amazon EKS
- **Monitoring & Observability:** CloudWatch, CloudTrail, performance diagnostics, incident response, AI agent tracing and evaluation
- **Security & Identity:** IAM least-privilege design, KMS, GuardDuty, encryption, Config rules, CloudTrail logging, compliance frameworks, risk management access control
- **Networking:** TCP/IP, DNS, VPN, load balancing, firewalls, IDS/IPS
- **AI & Machine Learning:** Amazon Bedrock, Bedrock AgentCore, Strands Agents, SageMaker, MCP, Agentic AI architecture, AI governance, OCR pipelines
- **Languages & Frameworks:** Python, JavaScript, TypeScript, SQL, Bash, React, Next.js, Node.js, Express, HTML, CSS
- **Backend & APIs:** RESTful API design, microservices, serverless and event-driven architectures
- **Databases & Data:** MySQL, MongoDB, Amazon RDS, Pandas, NumPy, data cleaning and validation, dashboards and reporting
- **Soft Skills:** Cross-functional collaboration, stakeholder and client communication, client onboarding, technical documentation (runbooks), problem solving, mentoring

## PROFESSIONAL EXPERIENCE

---

### Data Analyst | CCI Global HQ

12/2025 - Present

**Focus Areas:** Commercial and market intelligence, data research and validation, RFP and bid analysis

- Analysed large company and decision-maker datasets against defined business criteria to identify and prioritise commercial opportunities. Gave leadership a structured, criteria-based view of where to focus commercial effort.
- Built structured datasets from multiple information sources, validating records and removing inconsistencies. Improved overall data quality and the reliability of downstream analysis and reporting.
- Reviewed RFP and tender requirements flagged key obligations and information gaps, and drafted clarification questions. Supported structured, well-informed bid responses.
- Produced business case studies, opportunity analysis, reports and dashboards for leadership. Translated complex data into clear, actionable recommendations for decision-making.
- Troubleshoot data pipeline issues and consolidated fragmented project information into reusable datasets and knowledge resources. Supported future analysis and decision-making across projects.

### Tech Support | Skyned Consults Ltd.

05/2025 - 08/2025

- Provided frontline technical support for telecom and fiber optic customers. Served as the first point of contact for connectivity and service issues.
- Diagnosed and resolved connectivity and infrastructure issues raised through support tickets. Ensured timely resolution and clear communication with customers.
- Assisted in configuring and troubleshooting customer networks. Helped customers get stable working connections.

- Configured and troubleshoot VPNs and cloud access solutions for customers. Enabled secure access to the systems they needed.
- Supported system monitoring across customer services. Helped maintain service reliability and minimise downtime.

### **Cloud Engineer (Part-time) | Shinrai Technologies**

**03/2025 - 04/2025**

#### ***Client Base: Enterprise clients***

- Architected a media streaming platform leveraging Amazon S3 (storage), Rekognition (content moderation), Translate (translation), and Transcribe (transcription). Reduced manual content moderation effort by 90%, expanded multilingual audience reach by 45%, and automated transcription workflows for accessibility.
- Built and maintained CI/CD pipelines with Terraform, CloudFormation and AWS CodePipeline. Reduced deployment errors and improved release speed.
- Conducted AWS Well-Architected Reviews with enterprise clients, identifying security gaps, performance bottlenecks, and cost inefficiencies. Delivered actionable remediation roadmaps that improved compliance by 30% and cut monthly spending by up to 35%.
- Guided clients through cloud onboarding, access configuration and integrations. Improved successful deployment rates by 35%.
- Explained complex AWS concepts to non-technical clients and teams. Improved their confidence in, and adoption of, cloud solutions.

### **DevOps/Cloud Engineer | E&M Technology House Ltd**

**12/2024 - 02/2025**

- Provisioned and maintained AWS environments using Terraform, automating infrastructure setup. Reduced manual effort by 40%.
- Cut total cost of ownership by 40% by rightsizing workloads, optimizing storage tiers, and introducing Reserved Instances. Delivered tailored executive reports, enabling business leaders to approve further modernization projects.
- Improved application scalability by 30% during cloud migrations by building blueprints and running client-facing architecture workshops. Achieved zero downtime cutovers for retail and healthcare clients with >10K daily active users.
- Optimised cloud infrastructure for scalability and security, following DevOps best practices. Strengthened the reliability of client deployments.
- Strengthened enterprise alignment by contributing to architecture boards, documenting integration patterns, and raising risks in a technical debt register. Applied TOGAF and SAFe frameworks to ensure all solutions are mapped to enterprise strategy and delivery roadmaps.

### **Cloud Engineer (Freelance) | Independent Projects**

**01/2024 - 12/2024**

#### ***Client Base: Auction, education technology and small-business clients***

- Delivered scalable, secure cloud solutions for clients across industries. Enhanced system reliability and reduced operational costs.
- Migrated Andy's Car Auction operations to AWS using auto-scaling EC2, S3, RDS and load balancing. Enabled 24/7 online auctions and operational continuity, improving customer reach by 30%.
- Integrated an ML-powered OCR pipeline for AcadeML on AWS SageMaker and Lambda. Improved academic document processing by 25%.
- Built a real-time inventory management system for a small business. Increased stock tracking accuracy by 35%.
- Built and debugged containerised MERN microservices on ECS and EKS. Resolved networking, IAM and deployment issues across client environments.

### **Engineer Intern | Kenya Power ( E-plant Depot )**

**04/2023 - 09/2023**

- Assisted in routine maintenance and troubleshooting of electrical equipment and systems. Built hands-on depth in electrical and control engineering principles.
- Supported planning and execution of electrical projects, including system upgrades and new installations. Gained practical project coordination experience.
- Tested and validated electrical systems and components, and repaired transformers (tanking, tapping system troubleshooting and untanking). Provided technical support to multiple departments.
- Followed safety protocols, took part in safety training and drills, and helped manage inventory of electrical components and tools. Supported compliance with industry safety standards.

## CERTIFICATIONS

---

- **AWS Certified Solutions Architect Professional:** Date obtained: 02/2026 ([View -Here](#)).
- **Google Cybersecurity Professional Certificate:** Date obtained: 07/2026 ([View here](#)).
- **Agentic AI, POC to Production on AWS:** Date obtained: 09/2026 ([View here](#)).
- **Kubernetes and Cloud Native Associate (KCNA):** Date obtained: 05/2025 ([View here](#)).
- **AWS Well-Architected Proficient:** Date obtained: 03/2025 ([View here](#)).
- **AWS Certified Cloud Practitioner:** Date obtained: 2024 ([View here](#)).
- **CISCO Network Support and Security:** Date obtained ([View here](#)).

## PROJECT HIGHLIGHTS

---

- **Securing Agentic AI on AWS:** designed identity, tool access and trust boundaries for AI agents using Amazon Bedrock AgentCore, OAuth 2.0 and MCP. [GitHub](#) | [Article](#)
- **AI Agent Stack on Amazon EKS** built one customer service agent three ways (self-managed, integrated and fully managed) with Bedrock and Strands Agents. [Article](#)
- **Braid, Fair Mentorship Pairing Engine:** team project (TypeScript, Next.js, AWS) awarded an Honorable Mention at Mentor Me Collective X Grow with Google 2026; contributed cybersecurity, access control and privacy. [GitHub](#)
- **Well-Architected Microservices with CI/CD:** microservices on Amazon ECS with CodePipeline and CodeBuild; presented at AWS Cloud Club Strathmore. [GitHub](#)
- **Full-Stack Applications:** MERN apps developed, including AfyaSmart (clinic follow-up reminders with a CI/CD pipeline), Little Box Foundation Website and a Coffee Suppliers app with containerised microservices. [GitHub](#)

## EDUCATION & TRAINING

|---------------------------------------------------------------------------------------------------------|-------------------|
| Google Cybersecurity Professional   Mentor Me Collective x Grow with Google Programme 03/2026 - 09/2026 |                   |
| Software Engineering, MERN Stack   Power Learn Project Africa                                           | 02/2025 - 08/2025 |
| AWS re/Start Cloud Training   Kenya                                                                     | 01/2024 - 04/2024 |
| BSc Control Engineering, Second Class Upper   Multimedia University of Kenya                            | 09/2019 - 10/2023 |

## ADDITIONAL INFORMATION

---

- **CloudmyTribe Cloud Community, Project Lead** (06/2024 – 8/2024): run cloud workshops and content, and mentor aspiring cloud engineers on AWS fundamentals, certification paths and hands-on projects.
- **Technical writing:** 10 articles on Medium covering AWS, Terraform, containers and agentic AI security.
